Finally, the term "contractor" includes the contractor's subcontractors who

(i) Operate AEDC test and evaluation facilities, or

(ii) Handle, receive, reduce, interpret, or transmit data obtained, utilized, or produced in conjunction with testing and evaluation or analysis.

(2) "Development" means all efforts taken toward the solution of broadly-defined problems. Development may encompass research, evaluating technical feasibility, proof of design and test, or engineering of programs not yet approved for acquisition or operation.

(3) "Organizational conflict of interest," or "OCI," means that a relationship or situation exists where an offeror or Contractor (including chief executives and directors, to the extent that they will or do become involved in the performance of the contract, and proposed consultants or subcontractors where they may be performing services similar to the services provided by the prime) has past, present, or currently planned interests that may directly or indirectly relate to the work to be performed under a Department of Defense contract which

(i) May diminish its capacity to give impartial, technically sound, and objective assistance and advice, or

(ii) May result in it having an unfair competitive advantage. OCI does not include the normal flow of benefits from the performance of the contract.

(4) "OCI mitigation plan" means the formal written description of the actions the Contractor has agreed to take to mitigate an OCI. The Government is responsible for approval and enforcement of the Contractor's plan. While implementation of the mitigation plan rests largely with the Contractor, the Government bears responsibility for ensuring the plan is properly implemented.

(5) "Proprietary information" means all information designated as proprietary in accordance with law and regulation, and held in confidence or disclosed under restriction to prevent uncontrolled distribution and unauthorized use. Examples include, but are not limited to, marked information, information submitted in confidence to the Government, limited or restricted data, trade secrets, sensitive financial information, and computer software. Proprietary information may also appear in cost and pricing data or involve classified information. Refer to FAR 3.104-1 for the definition of contractor bid and proposal information requiring protection. Refer to FAR 3.104-4 for disclosure, protection, and marking of contractor bid or proposal information and source selection information.

(i) Proprietary information shall not include information which

(A) Was known to the contractor prior to its receipt from a company or the Government,

(B) Was independently developed by the contractor without access to a company's proprietary data,

(C) Is or becomes public knowledge without the fault of the Contractor,

(D) Has been lawfully obtained by the contractor without restrictions on disclosure from a source other than a company or the Government, or  
(E) Is or becomes available to a third party from a company on an unrestricted basis.

(ii) Other limitations set forth in this contract may apply to the use of information and data. The burden of proof as to the applicability of any of the exceptions described in paragraph (b)(5)(i) shall rest on the contractor.

(6) "System" means a combination of two or more interrelated pieces of equipment (or sets) arranged in a functional package to perform an operational function or to satisfy a requirement. A system can include a grouping of hardware, software, and materials to perform a designated function with specified results. A "major subsystem" means a functional grouping of components that combine to perform a key function within an element such as electrical power, attitude control, sensor imaging, and propulsion. "Component" means any sub-part of a system or major subsystem that performs a specific function, but is not capable of executing the primary function of the system or major subsystem independent of other components.

Systems and major subsystems include, but are not limited to, aircraft, missiles, bombs or other weapons, air-breathing engines, liquid and solid propellant rockets, rocket motors, spacecraft, reentry vehicles, satellite mission payloads, solar arrays, and power generating systems. Components include, but are not limited to, electrical harnesses, star trackers, gyroscopes, line replaceable units, linkages, integrated circuits, and bolts.

(c) Except to the extent required in the performance of this contract according to its terms, the Contractor shall not, during the performance of the contract and for a period of three (3) years following completion of performance thereof, engage as a prime contractor (or subcontractor without an approved OCI mitigation plan) in any design, development, or production of aerospace systems or major subsystems of a type normally developed, tested, or evaluated in AEDC facilities, or facilities similar to AEDC facilities. The Contractor also shall not engage in studies or act as a consultant in those regards during the foregoing timeframe. These restrictions do not apply to prime contracts or subcontracts for components

(d) The Contractor may gain access to proprietary information of other companies during contract performance. When the Contractor has access to the proprietary information of other companies, the Contractor must enter into a company-to-company agreement to:

(1) Protect another company's information from unauthorized use or disclosure; and

(2) To refrain from using the information for any purpose other than that for which it was furnished. The Contractor shall furnish these agreements to the Contracting Officer for review and approval. The Contractor is not permitted to use the proprietary information obtained in performing this contract for any other purpose without the prior approval of the Contracting Officer.

(e) The Contractor shall comply with all restrictions described in FAR 9.505. The Contractor must also thoroughly inculcate in its employees, through formal training in company policies and procedures, an awareness of the philosophy of both this clause and FAR Subpart 9.5. All employees shall be educated in and

formally acknowledge the absolute necessity of refraining from divulging proprietary information from other companies received in connection with work under this contract to any unauthorized person.

(f) The Contractor shall require its employees to sign written agreements prohibiting proprietary information disclosure except in accordance with a Government-approved plan. This written agreement shall in substance provide that such employee will not, during their employment by the contractor or thereafter, disclose to others or use for their own behalf, proprietary information from other companies received in connection with the work under this contract. The agreement shall acknowledge the employee is trained regarding handling proprietary information and discuss penalties for violations.

(g) If the Contractor discovers an actual or potential OCI not previously considered and adequately mitigated under this clause and a Government-approved OCI mitigation plan, the contractor shall make a prompt and full disclosure in writing to the Contracting Officer. This disclosure shall include a description of the action the Contractor has taken or proposes to take, or actions recommended to be taken by the Government, in order to avoid, neutralize, or mitigate the conflict.

(h) The contractor shall report any violation or suspected violation of this clause or a Government approved OCI mitigation plan, whether by its own personnel or those of its subcontractors, to the Contracting Officer. This report shall include a description of the violation and the actions the contractor has taken or proposes to take to mitigate and avoid repetition of the violation. The Contractor shall routinely monitor its proposed business development and shall discuss any real or perceived OCI issues with the Contracting Officer and affected AEDC customers to proactively resolve and / or mitigate potential OCI issues. After conducting any necessary discussions, the Contracting Officer and the Contractor shall agree on appropriate corrective action, if any, or the Contracting Officer shall direct such action, subject to the terms of this contract.

(i) OCI violations are a significant contract performance issue. Violations of an OCI mitigation plan or this clause may have consequences such as award fee decrements, contract termination, suspension and debarment, or other appropriate remedies or administrative actions.

(j) The Contractor may propose changes to an approved OCI mitigation plan. Such changes are subject to the mutual agreement of the parties and will become effective only upon incorporation by contract modification or written approval of the revised plan by the Contracting Officer.

(k) The Government shall require proper checks and balances in contract performance and minimization of the potential conflicts of interest between the Test Operations and Sustainment (TOS) and Test Services advisory and assistance services (A&AS) efforts. Therefore, a company cannot be a Contractor on the TOS contract and perform work at AEDC under the Test Services A&AS contract.

(l) For all other AEDC support contracts, the Government realizes the potential exists for actual or perceived OCIs to develop if the same Contractor performs work on both the TOS contract and another AEDC contract. To alleviate these concerns, a Contractor performing work in any role on the TOS contract must have an

approved mitigation plan prior to performing any work on any other AEDC contract.

(m) The Contractor shall include paragraphs (a) through (l) of this clause in every subcontract, purchase order, or other agreement. Exceptions must be approved in writing by the Contracting Officer.

#### **(H050) RIGHTS IN INFORMATION AND DATA (AUG 2014)**

In paragraph (a) below, the second to last sentence is modified to provide that "Subcontractor shall mark the number of this subcontract and the Prime Contract on all data, computer software, and computer software documentation delivered hereunder."

- (a) The contractor shall transfer ownership to the Government of all technical data, computer software, and computer software documentation as defined in DFARS 252.227-7013 and 252.227-7014, and all other data of any description or form, including all sketches, notebooks, designs, drawings, specifications, blueprints, models, negatives, photographs, findings, memoranda, reports, recommendations, automated data processing equipment (ADPE) programs, as well as all copies of the foregoing, created, produced, developed, delivered, furnished, or provided under this contract, unless otherwise identified by the contractor in DFARS 252.227-7017 as being furnished with Government purpose rights, limited rights, or restricted rights under either DFARS 252.227-7013 or DFARS 252.227-7014. Except for technical data, computer software, or computer software documentation identified by the contractor under DFARS 252.227-7017 as being furnished with Government purpose rights, limited rights, or restricted rights, the contractor retains no right, title, or interest in and to such data, computer software, and computer software documentation which becomes the property of the Government. This property shall be delivered by the contractor to the Government upon completion or termination of this contract or when directed by the Contracting Officer. The Government reserves its right to take delivery of this data, computer software, and computer software documentation via Contract Data Requirements Lists (CDRLs) or as deferred delivery at the point the Government chooses. As owner, the Government may use, reproduce, or disclose the data, computer software, and computer software documentation covered by this clause in any way and for any purpose it may desire with the exception that competition sensitive data, marked as such by the contractor and so agreed to by the Government, such as personal data on individuals, payroll records, management methodology, and organizational approaches, shall not be disclosed outside the Government. The contractor shall mark the number of this contract on all data, computer software, and computer software documentation delivered hereunder. Any data, computer software, or computer software documentation belonging to third parties and furnished to the contractor by the Government in performance of this contract shall be treated as property of the Government.
- (b) Except as specifically authorized by this contract, or as otherwise approved in writing by the Contracting Officer, all information and data furnished by the Government to the contractor in the performance of this contract shall be used only in connection with the work under this contract and shall be protected by the contractor from unauthorized use, release, duplication, or disclosure.
- (c) The contractor shall take appropriate measures to assure that its personnel, who have or might reasonably have access to such information and data referred to in paragraph (b) above, agree to honor the contractor's commitment and safeguard such information and data (See Section H Clause H115, Organizational Conflict of Interest (MAY 2014)).
- (d) If the contractor acquires technical or other data, computer software, or computer software

documentation necessary for the performance of this contract from any third party through license or otherwise, in addition to providing the Government with rights or title to such data, computer software, and computer software documentation in accordance with subparagraph (a) of this clause, the contractor shall also obtain all rights necessary to allow such rights in data, computer software, and computer software documentation to be assigned to any successor contractor to this contract.
